

# **Sri Lanka**

## Wind Development Status

**Noel Priyantha**  
Chief Engineer (Renewable Energy)  
Ceylon Electricity Board  
**Email: [eeppp@ceb.lk](mailto:eeppp@ceb.lk)**

### **Third Quantum Leap in Wind Workshop**

What will it take to accelerate wind development in Asia and the Pacific?

4 – 5 June 2012, ADB Headquarters, Manila, Philippines

# Wind Project Status in Sri Lanka

Wind Projects	Size in MW	Developer Name/Region	Comments
In pipeline	100	Ceylon Electricity Board (CEB) subsidiary /Mannar	Wind measurement is being done.
Under construction	60	Developed by Private Sector/Puttalam & Kalpitiya	60 MW under construction. Grid connection will be done by August 2012
Installed in past 24 months	30	Developed by Private Sector/Puttalam	30 MW grid connected.

## **What can be done to accelerate wind development?**

- Wind resource measuring
- Strengthen the CEB Grid to accommodate 100 MW project in Mannar
- Further study on grid connection and wind absorption
- Further study to determine new PPA terms

## **New developments in terms of policy, tariff and other enablers**

- New tariff will be announced (August 2012)
- New policy decision was taken to develop wind power by CEB subsidiary
